CasperFresh actionable steps to capture vital human intellectual property that is walking out the door into retirement or promoted into a new position. Our corporation continuously would let amazing "battle-

tested" talent move on without an inkling of thought about preserving their vital information. Based on this book, our leadership team re-engineered our transition-out process to capture critical knowledge (problems/solutions, important contacts information, streamlined processes, mistakes that they learned from, etc...) and make this vital critical knowledge digestible for the new person transitioning-in. I liked how the authors Leonard and Barton shared sample questions for what they call "Deep-Smarts" interviews. They did not hold back providing the goods to take what you learn, execute it in real life and provide your company a competitive advantage. 0 of 0 people found the following review helpful. How to transfer your organization's most important knowledge—before it walks out the door When highly skilled subject matter experts, engineers, and managers leave their organizations, they take with them years of hard-earned, experience-based knowledge—much of it undocumented and irreplaceable. Organizations can thereby lose a good part of their competitive advantage. The tsunami of "boomer" retirements has created the most visible, urgent need to transfer such knowledge to the next generation. But there is also an ongoing torrent of acquisitions, layoffs, and successions—not to mention commonplace promotions and transfers—all of which involve the loss of essential expertise. Dorothy Leonard and Walter Swap first addressed this acute loss of knowledge in their groundbreaking book *Deep Smarts* (2005). Since then, managers have repeatedly asked them for practical, proven techniques that will help transfer those deep smarts—the organization's critical, experience-based knowledge—before it's too late. Now, with coauthor Gavin Barton, the authors share a comprehensive approach to doing just that. Based on original research, numerous interviews with top managers, and a wide range of corporate examples, *Critical Knowledge Transfer* provides a variety of practical options for identifying your firm's deep smarts and transferring that intelligence from experts to successors. *Critical Knowledge Transfer* will enable managers to:

- Determine the seriousness of their knowledge loss
- Identify the deep smarts essential to their business
- Utilize proven techniques for transferring knowledge when its loss is imminent
- Identify and implement long-term transfer program apprenticeships
- Set up individual learning plans for successors
- Assess the success of their knowledge transfer initiatives
