Larry Burkett : Debt-Free Living: Eliminating Debt in a New Economy before purchasing it in order to gage whether or not it would be worth my time, and all praised Debt-Free Living: Eliminating Debt in a New Economy:

Trust the Title!By dasygmjThis book answered a lot of questions for me especially the fact the author truly references the bible and instruction that God wills for us in our everyday financial lives. Within 5 days, I had paid off 2 credit cards, transferred a balance to another card and cut those up, along with applying funds to areas that were a burden. I slept with ease knowing that when i woke up I could handle the next bill and/or collector without panic. I wasn't dodging the phone or the mailbox and within a few weeks of applying the methods and advise I had a plan that a year later I still use and the only debts I have now are our home

and standard utility bills. No more car payments, no more credit cards and we have money in the savings account. Since then, most every purchase has been made in cash without even flinching, shrinking or regretting. Life is good and getting better everyday. 0 of 0 people found the following review helpful. Seeing Beyond By Billy FiveRight off the proverbial bat I will say if you are not a believer and do not have an active relationship with the Holy Spirit, do not bother, as much of this book involves that belief. As for the negatives about the bulk of the book being drawn out case histories? Guilty. However, on the other hand, they are great, true scenarios on how some of us get into trouble/debt in the first place. The description of how our country/culture wound up so debt dependent is interesting as well. If you have a grasp on such things as "The Kingdom Economy" and what (and how very much) the Bible has to say about debt, cosigning, materialism and giving, and you truly want the truth about how you got into and can get out of debt, why it is so seemingly "normal" these days, and that God will indeed intercede when we do what is consistent with His word, this book and the ministry the author founded that has helped thousands will benefit you. Otherwise, there are thousands of books on the subject that you will probably buy with a credit card even if you can't really afford it. 2 of 2 people found the following review helpful. Great Blueprint for Digging-Out By GoldFalconSix I bought this book several years ago. It has proven so applicable, and the principles and techniques so practical and valuable, that I re-read it every six months to get myself back on course as I dig out of debt. By now my copy is highlighted, marginal-noted, and dog-eared to the max. Absolutely superb. It is so valuable, in fact, that I ordered another copy and transferred all my notes and highlights as a gift to my son to help him learn from my pain. The comment by a reviewer asking why 150,000 copies sold has a simple answer: many people found the book well worth the money. Guess I bought two of those copies! Further, several reviewers seem uncomfortable with the "Christian bias" throughout the book. Certainly, the author bases much of his financial advice (which works, by the way!) on his Christian values. But whether the reader is a Christian or not, if the values and advice make common sense, and if these values and advice lead the reader out of the pit of debt, then so what? We still have a distance to travel in the journey of getting out of debt, but my family is in infinitely far better financial shape for carefully implementing Burkett's advice. And again, I periodically review the entire book "religiously," pardon the pun!

Credit is so easily obtained, and credit card applications flow into our mailboxes virtually every day. Many couples find themselves deeply in debt and not even sure of how they got there, let alone how they can get out of it. Larry Burkett has the solution! His bestselling book, Debt-Free Living, has been updated and modernized. Debt-Free Living has been providing poignant and biblical teaching on debt for over a decade. This updated resource will teach the consumer about the origin of most financial troubles and help him or her break the 'debt cycle.' Debt-Free Living is a necessary resource to battle the temptation and trappings of debt that are weighing you down.

(Dave Ramsey on the back cover for sure... and the others if there is room. All of them on the inside pages.) When Larry Burkett's Debt-Free Living was first published in 1989, I could have been one of the horror story case studies that opened the book. Coming out of my own bankruptcy at the time, I was on a mission to discover how money really works. Debt-Free Living was a light in my darkness, giving voice to a lifetime of common-sense financial principles that I had largely ignored. Now, twenty years later, I believe there has never been a better time for the time-honored, godly principles of this book to make a comeback. Dave Ramsey is the best-selling author of The Total Money Makeover, a nationally syndicated radio talk show host, and host of The Dave Ramsey Show on the Fox Business Network. It is a privilege for me to endorse the revised Debt Free Living by the person who impacted his world like no other. Larry's life message is sorely needed today. As he would say, "God's principles of finances are always right, always relevant, and will never change." Ron Blue is a best-selling author and president of Kingdom Advisors. Sometimes it seemed as though Larry Burkett could see around corners. He certainly saw things long before the rest of us. That's why his warnings about the dangers of debt and the direction of our economy still ring true. Indeed, the turmoil of recent years has given even greater force to his insights. Of course, as Larry would say with genuine humility, "All I do is plagiarize Scripture." He saw his role as simply trying to convey that God's Word is true and that the Lord can be trusted. Indeed, that's what Debt-Free Living is all about. Austin Pryor is Founder and President, SoundMindInvesting.com
