before purchasing it in order to gauge whether or not it would be worth my time, and all praised Environmental Communication. Second Edition: Skills and Principles for Natural Resource Managers, Scientists, and Engineers.:

0 of 0 people found the following review helpful. A helpful overview  
By ArieI bought this book more than a year ago and had only read it partially. I recently picked it up again to prepare for a lecture on environmental communication and I found it helpful. It gives a comprehended overview of the many issues involved in effective communication on environment.  
0 of 5 people found the following review helpful. One Star  
By MalScrew this stupid class. Never even needed to buy this boring book.

Environmental professionals can no longer simply publish research in technical journals. Informing the public is now a critical part of the job. Environmental Communication demonstrates, step by step, how it's done, and is an essential guide for communicating complex information to groups not familiar with scientific material. It addresses the entire communications process, from message planning, audience analysis and media relations to public speaking - skills a good communicator must master for effective public dialogue. Environmental Communication provides all the knowledge and tools you need to reach your target audience in a persuasive and highly professional manner. "This book will certainly help produce the skills for environmental communications sorely needed for industry, government and non-profit groups as well as an informed public". Sol P. Baltimore, Director, Environmental Communications and Adjunct faculty, Hazardous Waste management program, Department of Chemical Engineering, College of Engineering, Wayne State University, Detroit, Michigan. "All environmental education professionals agree that the practice of good communications is essential for the success of any program. This book provides practical skills for this concern". Ju Chou, Associate Professor, Graduate Institute of Environmental Education National Taiwan Normal University Taipei, Taiwan

From the reviews: "This book will certainly help produce the skills for environmental communications sorely needed for industry, government and non-profit groups as well as an informed public". (Sol P. Baltimore, Director, Environmental Communications and Adjunct faculty, Hazardous Waste management program, Department of Chemical Engineering, College of Engineering, Wayne State University, Detroit, Michigan) "All environmental education professionals agree that the practice of good communications is essential for the success of any program. This book provides practical skills for this concern". (Ju Chou, Associate Professor, Graduate Institute of Environmental Education National Taiwan Normal University Taipei, Taiwan)
