From Palgrave Macmillan : Materiality and Space: Organizations, Artefacts and Practices (Technology, Work and Globalization) before purchasing it in order to gage whether or not it would be worth my time, and all praised Materiality and Space: Organizations, Artefacts and Practices (Technology, Work and Globalization):

Materiality and Space focuses on how organizations and managing are bound with the material forms and spaces through which humans act and interact at work. It concentrates on organizational practices and pulls together three separate domains that are rarely looked at together: sociomateriality, sociology of space, and social studies of technology. The contributions draw on and combine several of these domains, and propose analyses of spaces and materiality in a range of organizational practices such as collaborative workspaces, media work, urban management, e-learning environments, managerial control, mobile lives, institutional routines and professional identity. Theoretical insights are also developed by Pickering on the material world, Lyytinen on affordance, Lorino on architecture and Introna on sociomaterial assemblages in order to delve further into conceptualizing materiality in organizations.

About the Author David Avison, ESSEC Business School, France Emmanuel Baudoïn, University of Paris-Dauphine, France Michèle Charbonneau, l'École nationale d'administration publique, Canada Florence Charue-Duboc, Ecole Polytechnique, France Stewart Clegg, University of Technology, Australia Julie Fabbri Ecole Polytechnique, France Bhumika Gupta, University of Pau, France Lotta Haunskinen, University of Turku, Finland Lucas D.
