are making money from home. It teaches you about your own qualities and how to use them to your full potential. I am not a marketing pro and it was super easy for me to follow. I refer back to it all the time when making decisions for my business. The book describes common business paths and how to dive in if those paths are good for you. The marketing tools are outadgious and I have personally used plenty of her suggestions. Moonlighting on the Internet also opened my eyes to Intentional marketing and how to go a step further when marketing my business online. I honestly have a totally different approach to everything I do because of this book. It has changed my life for the better both in my career and everyday decision making. If you are a work from home parent like me, this book will provide a path to success through realizing your reality and what type of business venture works best for your lifestyle. 2 of 2 people found the following review helpful. A Must Read By Naomi I just read Moonlighting on the Internet and I loved it. It reconfirmed what I already knew, but It also serves as motivation. I am currently starting another business, but before I read this book I was not sure if I had the drive or the money to invest in the business. I have now got everything I need and more. I have recommended this book to all my friends and family because it helps sort out what to do, and it gets rid of the get rich quick mentality because everything takes hard work and dedication. I will refer to my copy of Moonlighting on the Internet every time I get discouraged, or need to rethink my plan of attack. This book is for the serious people who want to make money from home, and have the drive to put in what it takes to become successful. 1 of 1 people found the following review helpful.
