Very helpful guide is you need to apply for Social Security ?..By Dr. OceanfrontBecause of the type of work I do, I often meet people who have disabilities and may no longer be able to do their job, or may be loosing their job. This is one of a few books that can actually help then go through the maze of SSD, so I show them the book and suggest they read it cover to cover (along with the Disability Workbook). Folks need to be prepared for all the paperwork involved and need to be aware of what is going to be a very long and usually uphill battle.Luckily, Nolo writes some excellent books in many areas (I also give out their Divorce book...trust me, a semi educated client is easier to work with then one who knows nothing about the predicament they are in!The book

contains a lot of information, and is also a workbook to help them apply for Social security (SSA). Many of my the clients that come to see me are extremely depressed and completely disorganized due to stress caused from their illness, and the fear of having just lost their job or are going to. There is always downward spiral because of the financial insecurity that is (or soon will be) happening, not to mention on top of that, the often physical and emotional pain they might be in. Don't get me wrong, I am not advocating SSI, but there are some people who truly have fallen into a situation, where their health has so deteriorated, this might be their best option...that is up to them and their doctor. This book is very good and any attorney would be pleased their client had many forms filled out, and had put critical thought into their situation before they come to an attorneys office. It will save them a lot of headaches and heartaches by getting their thoughts organized, so, someone else can review their history in a logical manner. This task will help them get the basic information they need and help them find all the documents they need. Any attorney these people have to see (or then SSA office) will be relieved to see the organized set of records this book (and another) will provide. This will allow for another to review the clear documents, while they guide you through a very arduous process. If you need to go down this road, be prepared. Educate yourself! [...]. Thanks. :) 3 of 3 people found the following review helpful.
