book has some interesting ideas, but it's an old book that will seem very dated. In addition, while I really like the ambitious idea of looking at politics, this book doesn't really do a thorough job of considering politics. Would I get it again? Uh uh.

Organizations do not have goals ndash; only people do. Furthermore, people within the same organizations have different goals. This book takes this as its starting point, recognizing that organizations are a dynamic coalition of individuals and groups competing and co-operating as they each pursue their various objectives. Power is a fundamental part of organizational behaviour but many previous studies failed to recognize its centrality. This book remedies this.
