Sim B. Sitkin, Laura B. Cardinal, Katinka M. Bijlsma-Frankema : Organizational Control (Cambridge Companions to Management) before purchasing it in order to gage whether or not it would be worth my time, and all praised Organizational Control (Cambridge Companions to Management):

1 of 3 people found the following review helpful. ExcellentBy Amybeth HaleGreat book, buddy! Proud to be a colleague and working at the same place. Looking forward to solving more problems with you in the future. There's a cool puzzle where I'm located that was written up on the SC site, too. Perhaps we could tackle that.

Organization scholars have long acknowledged that control processes are integral to the way in which organizations function. While control theory research spans many decades and draws on several rich traditions, theoretical limitations have kept it from generating consistent and interpretable empirical findings and from reaching consensus concerning the nature of key relationships. This book reveals how we can overcome such problems by synthesising diverse, yet complementary, streams of control research into a theoretical framework and empirical tests that more fully describe how types of control mechanisms (e.g., the use of rules, norms, direct supervision or monitoring) aimed at particular control targets (e.g., input, behavior, output) are applied within particular types of control systems (i.e., market, clan, bureaucracy, integrative). Written by a team of distinguished scholars, this book not only sheds light on the long-neglected phenomenon of organizational control, it also provides important directions for future research.

About the Author
Sim B. Sitkin is Professor of Management and Faculty Director of the Fuqua/Coach K Center on Leadership and Ethics at the Fuqua School of Business, Duke University.
